

Jørgen A. S. Bjørnethun

Jorgen.bjornethun@gmail.com

[Company Name]

I am excited to apply for the Frontend Developer position at **[Company Name]**. With a background in frontend development from Noroff college and practical experience creating responsive, user-friendly projects such as my *RainyDays e-commerce site* and *Community Science Museum project*, I bring technical expertise to every project I work on.

Through my education, I have built a foundation in **HTML, CSS, JavaScript, GitHub, and Figma**, and I have applied these skills to projects showcased in my portfolio. My projects demonstrate an ability to create modern, mobile-first websites with attention to usability and accessibility.

Beyond my technical skills, my experience as a Support Technician at **Foundever** has sharpened my problem-solving abilities and strengthened my communication skills. Working with Salesforce, software/hardware troubleshooting, and customer support taught me how to adapt quickly and explain complex concepts clearly—skills I now bring into collaborative development environments.

I am eager to contribute my knowledge and enthusiasm to **[Company Name]**, helping to build engaging, efficient, and visually appealing digital experiences. I am confident that my blend of technical skills and customer-focused mindset makes me a strong fit for your team.

I look forward to the opportunity to discuss how my background and projects align with your needs, thank you.

Sincerely,

Jørgen A. S. Bjørnethun
